Professor Joshua Lederberg  
Department of Genetics  
Stanford University  
School of Medicine  
Pala Alto, California

Dear Dr. Lederberg:

I am writing to ask for your assistance in finding a man who would like to undertake an investigation of genetics of malaria parasites as a member of our laboratory in Bethesda. We are particularly interested in the genetics of drug resistance and have available various interesting strains of malaria of mice and chickens as well as facilities for maintaining their mosquito vectors.

We can offer several different modes of employment, depending on the experience and qualifications of the applicant. These include a Reserve Commission in the Public Health Service, a two-year appointment as a Senior Fellow or appointment in the Civil Service.

Your suggestions will be a great help to us.

Sincerely yours,

*William F. Cantrell*
